# WESTERN REPAIR FACILITY

## McCARRAN, NV EQUIPMENT REPAIR CAPABILITIES

---

### Services

- Complete cosmetic, revac, and rebuild
- Service on all makes and models of stationary bulk tank and mobile equipment
- Inspection with detailed estimate prior to work
- Component replacement with stock OEM parts
- Latest design plumbing components
- One-year vacuum warranty
- Oxygen use certification
- Custom paint and decals available
- Flexible to meet special requirements and specifications

### Manufacturing

- Helium mass spec leak detection of inner and outer for vacuum integrity
- 100% regeneration of molecular sieve and SAES getters for maximum vacuum life
- Perlite repacking and super-insulation systems
- Upgrading or re-foaming of CO<sub>2</sub> vessels with SA-612 steel
- Complete blasting and painting available for a long-life new look
- Stainless steel and modular piping

### Key Facility/Equipment

- Cranes - 75 ton outdoor + 40 ton  
35 ton indoor
- Indoor Fabrication

### Yard & Storage Area

The large stabilized yard storage space accommodates heavy truck and crane traffic.

### Warehouse & Clean Room Area

The facility's warehouse and clean room are located adjacent to each other. The strategic placement of the clean room with the warehousing operation allows for the efficient movement of oxygen cleaned parts into and out of the warehouse for use by the production floor.

### Blast & Paint Area

Sandblasting and painting areas located on opposite sides of the facility for optimum paint finish.
